

Account created

Here you can find all the details needed to access your new Ethereal test account. Remember that if sending messages through SMTP then no message is actually delivered, all messages are caught and you can see these in the [Messages](#) page or by using your favorite IMAP/POP3 client.

Account credentials

Account details generated using [Faker.js](#)

NB! these credentials are shown only once. If you do not write these down then you have to create a new account.

Name	Arthur Jenkins
Username	arthur27@ethereal.email – this account can not be used for inbound emails 
Password	AekcP1dBQgF7avZEfH
Download as CSV Open Mailbox
